Profile Summary

Software Engineer with 3+ years of experience in full-stack development, REST API integrations, building scalable systems, and writing clean, maintainable code that drives real impact. Highly motivated, a quick learner, and always eager to take ownership and grow within high-performing teams.

Education

University of Petroleum and Energy Studies June 2018 – July 2022
*Bachelor of Technology, Computer Science and Engineering - **CGPA : 8.4/10*** *Dehradun, Uttarakhand*

Experience

Salesforce June 2022 – Present
Associate Technical Consultant *Bengaluru, Karnataka*
- Automated Loan Processing by implementing synchronous **RESTful** integration with FinnOne system, scaled to handle **10000+** applications daily, fulfilling complex compliance requirements of the bank making loan approvals faster by **50%** and error-free for end users.
- Built front-end UI for streamlined telephonic verification of loan applicant, resulting in a **70% reduction** in manual input time for the Underwriting team.
- Automated **fraud detection** logic using **asynchronous** RAMP API integration with Salesforce along with a **front-end UI** built using LWC to display the results, resulting in reduction of manual verification time by **90%** for income assessment team.

Salesforce Jan 2022 – June 2022
Associate Technical Consultant Intern *Dehradun, Uttarakhand*
- Architected the **data model**, implemented complex business logic, and delivered a **live demo** to senior developers for the capstone project, receiving **excellent feedback**.
- Developed **scalable** asynchronous Apex logic to send scheduled notifications to **10,000+** users across **600+** global locations when defined SLAs were breached, based on the escalation matrix.
- Completed code reviews, utilised best practices, and followed Agile workflows. Wrote and optimized Apex logic with **100% test coverage**.

Highpolar Softwares June 2021 – August 2021
Front End Developer Intern *Dehradun, Uttarakhand*
- Developed the **front-end** of a cross-platform Instant Messaging app for **iOS and Android** using **React Native**.
- Integrated with **Google Firebase** for real-time messaging and collaborated on **REST API integration** with a **Django backend** and utilised Git as a tool for version control.
- Crafted scalable, extensible code following MVC architecture, SOLID and DRY principles, and ensured quality through **Smoke, Unit, and End-to-End (E2E) testing**.

Projects

Majestic Hotels | *Java, React.js, MySQL* November 2024
- Built a full-stack hotel booking management app with **React.js frontend**, **Spring Boot backend** with 20+ RESTful APIs for **room search**, **booking**, and **user management**.
- Implemented user authentication/authorization and role based access for admins and customers using **JWT**.
- Integrated **MySQL** for storing Rooms data, user accounts, and bookings. Also, utilized **Amazon S3** for storing high resolution images for **100+ rooms** and implemented pagination for efficient data retrieval.

Technical Skills

Languages: Python, Java, C, HTML/CSS, JavaScript, SQL, C++, Apex
Developer Tools: VS Code, Git, GitHub, Heroku, Jira, Postman, Redis, Eclipse, Android Studio, Intellij IDEA, Jupyter Notebook, Firebase, MySQL, MongoDB, Apache Kafka
Technologies/Frameworks: Spring Boot, React.js, LWC, Redux toolkit

Certifications / Extracurricular

- **Semi-finalist** of Times of India quiz challenge.
- Received the **Achiever of the month** award among **3000+** employees for November FY'25 for outstanding performance and efforts.
- Solved **400+ problems** on Leetcode.
- Deep Learning Specialization, Coursera - View Credentials
